

P2 Visitor Facility and Accommodation Hub West

In this strategic western gateway location, a hub for visitor activities with overnight accommodation is proposed to be developed in an environmentally sensitive and responsive way. On the lower terrace planned facilities will range in size with large scale event opportunities such as concerts and weddings at a purpose-built facility. At a smaller scale there is opportunity to establish recreation businesses or a coffee cart/containers adjacent to the new carpark. On the upper slopes there are intimate eco-cabins nestled in the native bush alongside an opportunity to establish a café or restaurant on an elevated north facing plateau with extensive views of the region.
